

Sustainable Agricultural Solutions Summer Course

25 June - 20 July, 2023

Sde Boqer Campus, Israel

The 4 weeks intensive course offers to international students the opportunity to explore a combination of both basic and applied research in agricultural and environmental topics related to drylands.

The course will provide access to cutting-edge knowledge and technology to improving food and water security worldwide in face of global climate changes.

The program includes cultural events and weekly tours to discover Israeli culture and history. The course is held in [The Blaustein Institutes for Desert Research](#).

How to apply

Open to registered B.Sc., M.Sc., and Ph.D. students. Visit our [webpage](#) or contact Dr. Natalie De Falco at: agricourse@post.bgu.ac.il
